

## Micro Pulverizer Layout Options

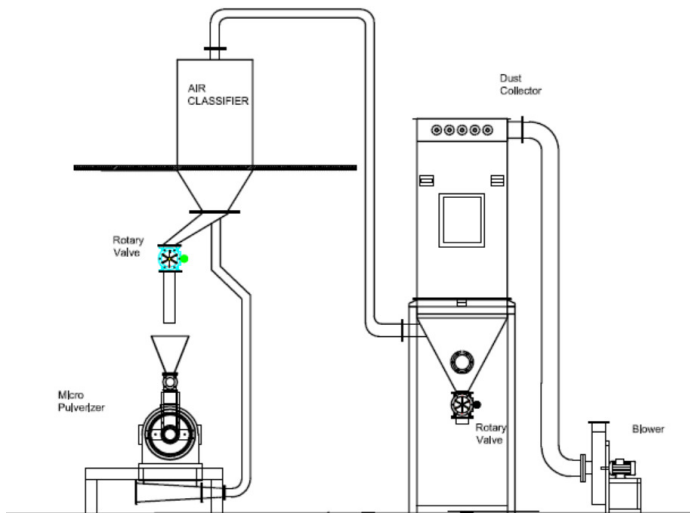

### Option A: Micro Pulverizer with Auto-Feeding System Discharge – Manual

### Option B: Micro Pulverizer with Auto-Feeding and Auto-Discharge System Discharge - Through Rotary Air-Lock Valve

### Option C: Micro Pulverizer with Air-Classifier and Dust Collector Discharge - Through Rotary Air-Lock Valve

- Very tight particle size control with classifier
- Regrinding of coarser particles
- Completely automatic system
- Dust-proof operation

Plot No. 3626, 4th Phase,  
GIDC Vapi 396195, Gujarat

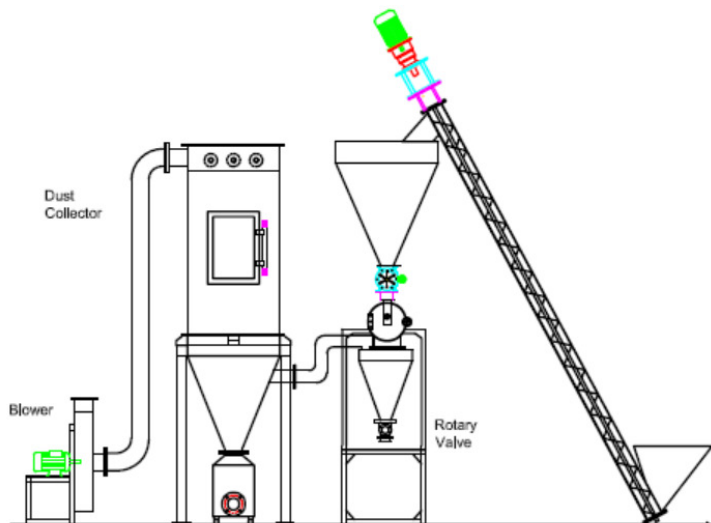

**Option D: Micro Pulverizer with Cyclone separator and Dust Collector  
Discharge - Through Rotary Air-Lock Valve**

- Particle size separation with cyclone separator
- Dust-proof operation
- Continuous operation

**Option E: Micro Pulverizer with Auto Charging and Dust Collector  
Discharge - Through Rotary Air-Lock Valve**

- Charging with screw conveyor
- Charging hopper for material storage
- Discharge through Rotary Valve
